

Prolonged heavy rainfall led to the worst flood disaster in decades. The German states Rhineland-Palatinate and North Rhine-Westphalia were particularly affected. In a very short time, 200 litres of precipitation per square metre fell in some areas – with dramatic consequences.

FLOODS IN GERMANY

Container donations for water supply: SCHÜTZ is helping quickly and unbureaucratically

Water masses surged through towns and villages, flooding houses, uprooting trees and sweeping away vehicles. Rivers burst their banks, roads were washed out, bridges damaged and thus impassable. Some communities are completely cut off from the outside world. Destruction of power lines and water pipes by the floods have

resulted in power outages and a shortage of drinking water. Fast on-site help is needed!

SCHÜTZ is supporting the THW (Federal Agency for Technical Relief), fire departments and the German Army with FOODCERT IBCs for the supply and treatment

of drinking water. We are cooperating closely with aid organizations. Among other things, our containers are in use at the Nürburgring THW crisis centre. For a few days now, Germany's oldest race track has no longer been a venue for motor sports, but a relief and crisis centre for the victims of the flood disaster.

SCHÜTZ is supporting the THW (Federal Agency for Technical Relief), fire departments and the German Army with FOODCERT IBCs for the supply and treatment of drinking water.

Various organisations have been quick to launch further relief efforts. Numerous material donations and relief supplies are received by the hard-hit regions of the Eifel and Ahr valley.

We wish those affected all the best for the reconstruction and hopefully a speedy return to normality!
