

# SCHÜTZ VASITEX acquires CARMOCAL in Brazil

An important step to strengthen our market presence in South America: With the acquisition of CARMOCAL DO BRASIL, we are strategically expanding our portfolio in the Brazilian market to include an experienced specialist in industrial packaging management. The Brazilian company will continue as an independent unit within SCHÜTZ VASITEX – a further step in our consistent global growth strategy.

CARMOCAL is established in the Brazilian market as a provider of services related to industrial packaging management and offers a broad portfolio in the areas of rental and fleet management, cleaning and inspection, sales, and specialized packaging programs for IBCs. Active in Brazil for more than 25 years, the company stands for quality and environmental responsibility with its ISO 9001/14001/45001 certification.

With the integration of CARMOCAL, we are gaining an established specialist with a strong market position. The transaction includes the operational sites in Brazil as well as the right to use the national brand. As an independent unit within SCHÜTZ VASITEX, the company will continue its existing business operations and maintain its established relationships with business partners. Both companies will initially operate independently of one another.

The transition is supported by a structured and transparent integration process that ensures business continuity and high service quality. The goal is to strengthen our operational capacity and make the range of solutions available to our customers in the Brazilian market even more comprehensive.

As a joint venture, SCHÜTZ VASITEX combines the production and service expertise of global market leader SCHÜTZ with the local expertise of VASITEX – the leading Brazilian company in

manufacturing, reconditioning, and recycling of blow-molded plastic containers, with more than 50 years of experience in the packaging industry. With over 400 employees, we currently operate seven production and service facilities in Guarulhos near São Paulo and in Camaçari, Bahia, covering a total area of more than 115,000 m<sup>2</sup>. Our portfolio includes IBCs, PE drums, and canisters – and, following the plant expansion in 2023, packaging from the GREEN LAYER series featuring high-quality recycled plastic in the middle layer.
