## SCHÜTZ continues to strengthen its European network. Strategic partnership with Repack in Italy

Cesara | Repack

Dello | SCHÜTZ Italia

Arzignano | Repack

Buscate | Repack

Stezzano | Repack

This latest partnership sees us continuing to expand across Europe. Repack, Italy's largest independent reconditioner of industrial packaging, brings four sites and three decades of experience to the SCHÜTZ service and production network. The new partners now have five locations and form a strong network for the remanufacturing of industrial packaging in Italy. This new alliance guarantees customers the best availability of top-quality, sustainable packaging solutions. Thanks to this new partnership, we can now offer professional solutions for all challenges posed by PPWR – from reuse to recycling.

**W**ith Repack, SCHÜTZ gains a partner that plays a decisive role in shaping the Italian market for the reconditioning of industrial packaging. Led by the brothers Stefano and Marco Capra, the group of companies has a presence in the most important industrial and economic regions of northern Italy through its sites in Cesara, Arzignano, Buscate and Stezzano. **This network offers our customers economic and environmental benefits, as well as maximum flexibility and efficiency.**

As an expert in reconditioning, Repack provides a comprehensive range of services, including the collection, reconditioning and recycling of industrial plastic packaging, and distribution. The company manufactures high-quality r-HDPE recyclate from the recovered containers, which is then reintroduced into the cycle – for example, for the production of PE drums. This consistent recycling process significantly reduces the use of virgin raw materials.

**“We are pleased to become part of the SCHÜTZ network and contribute our many years of expertise in the circular economy for industrial packaging in Italy to this strong partnership,”** says Stefano Capra, Repack’s Managing Director.

Acquiring a majority stake in Repack is an important milestone in SCHÜTZ’s expansion of its European reconditioning and circular economy network on the Italian market. It adds Repack’s well-established range

of reconditioned products and services to SCHÜTZ’s reconditioning business. **For our customers, this means we can guarantee the best availability of sustainable, top-quality products with maximum flexibility, for both reconditioned packaging in the open loop and customised services in the closed loop.**

“With Repack, we are strengthening our European network and thereby expanding the range of circular solutions for industrial packaging. This strategic partnership is a key building block for the continued expansion of our circular economy in Southern Europe. Customers will benefit from our shared commitment to sustainability, our unparalleled customer focus and our significantly expanded range of offerings, which will tangibly reduce logistics costs and CO<sub>2</sub> emissions,” says Veit Enders, member of the Executive Board at SCHÜTZ.
