

PRESS RELEASE / 22 September 2025

Ecobulk SX-D-OV: maximum protection and easy handling of sensitive filling products

In the form of the Ecobulk SX-D-OV, Schütz is presenting a new variant of its double-wall IBC system at the Fachpack 2025. This model combines maximum fire and leakage protection with the possibility of practical product discharge from below – another step towards complying with the increasing demands on safety and efficiency in sensitive supply chains.

The safe transport and storage of combustible hazardous liquids is regarded as one of the greatest challenges in packaging management. Schütz has developed the Ecobulk SX-D to meet these requirements: an IBC with an HDPE inner container and a completely closed, fireproof steel shell. This also serves as an integrated containment basin and prevents the contents from escaping even in the event of a fire. The double-wall design thus offers a high level of protection, even for demanding Class 6.1 hazardous goods. Thanks to its special properties, the SX-D is the only combination IBC to date with certification by FM Global. It also meets the requirements of Underwriters Laboratories (UL) with regard to safety and fire resistance. The Ecobulk SX-D is not only suitable for use in Ex zones 1 and 2, but also for particularly sensitive areas where fire and leakage protection and risk minimisation are top priorities. The IBC has a filling volume of 1,000 litres and contents can be discharged via the front bung on the top of the container.

With its Ecobulk SX-D-OV, Schütz has extended its tried-and-tested concept to include a decisive convenient advantage: a steel lid is integrated in the outer steel casing, which can be opened with a clamping ring and without tools. Behind it is the outlet fitting, which allows discharge from below – as with a conventional IBC. As soon as the lid is closed, the SX-D-OV offers full fire and leakage protection.

Interested parties can discover the Ecobulk SX-D-OV and other new products from Schütz at Stand 6-328 in Hall 6 at the FACHPACK.

About Schütz:

Schütz GmbH & Co. KGaA is a leading international producer of high-quality industrial packaging (Intermediate Bulk Containers, PE and steel drums, and jerrycans). The Group's headquarters are in Selters, Germany. Founded in 1958, SCHÜTZ employs over 7000 people at more than 70 production and service sites around the world. The four SCHÜTZ business units, PACKAGING SYSTEMS, ENERGY SYSTEMS, INDUSTRIAL SERVICES and COMPOSITES, each hold leading positions in their respective markets. The Group's turnover in 2024 was 2.5 billion euros. The company provides its customers a fully circular product and service offering. In line with its sustainability philosophy, the SCHÜTZ TICKET SERVICE operates within a closed-loop system, ensuring the seamless collection and reconditioning of emptied industrial packaging in all of the world's industrial nations.
